AMENDMENTS TO THE CLAIMS

This listing of claims replaces all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1. (Currently amended) A mobile communication system comprising a mobile terminal and a subscriber information management apparatus that manages subscriber information,

wherein said mobile terminal comprises:

detecting means for detecting a loading of a plurality of recording [[medium]] media, each of the plurality of recording media storing a subscriber identity to be sent to said subscriber information management apparatus; and

transmitting means for transmitting, when said detecting means detects at least two recording media, first subscriber identity information corresponding to a first recording medium [[and]] along with second subscriber identity information corresponding to a newly detected recording medium, to said subscriber information management apparatus, and

wherein said subscriber information management apparatus comprises:

receiving means for receiving said first subscriber identity information [[and]] along with said second subscriber identity information from said mobile terminal; and

Application No. 09/903,958
Amendment "C" dated March 21, 2006
Reply to Office Action mailed September 22, 2005

registering means for registering location area information of said first subscriber identity information as location area information associated with said second subscriber identity information.

Claim 2. (Original) The mobile communication system as claimed in claim 1, wherein said recording media is a subscriber identity module card.

Claim 3. (Original) The mobile communication system as claimed in claim 1, wherein said first subscriber identity information is subscriber identity information stored in said first recording medium or temporary subscriber identity information corresponding to the subscriber identity information stored in said first recording medium, and said second subscriber identity information is subscriber identity information stored in said newly detected recording medium.

Claim 4. (Original) The mobile communication system as claimed in claim 1, wherein said first subscriber identity information and said second subscriber identity information are associated with respective telephone numbers.

Claim 5. (Original) The mobile communication system as claimed in claim 1, wherein said first subscriber identity information and said second subscriber identity information are associated with respective mail addresses.

Claim 6. (Currently Amended) A mobile terminal comprising:

Application No. 109-903,958
Amendment "C" dated March 21, 2006
Reply to Office Action mailed September 22, 2005

detecting means for detecting a loading of a plurality of recording [[medium]] media,
each of the plurality of recording media storing a subscriber identity to be sent to a subscriber
information management apparatus; and

transmitting means for transmitting, when said detecting means detects at least two recording media, first subscriber identity information corresponding to a first recording medium [[and]] along with second subscriber identity information corresponding to a newly detected recording medium, to [[a]] said subscriber information management apparatus ~~that-manages~~
subscriber-information.

Claim 7. (Currently Amended) A subscriber information management apparatus for managing subscriber information, comprising:

receiving means for receiving first subscriber identity information [[and]] along with second subscriber identity information from a mobile terminal; and

registering means for registering location area information of said first subscriber identity information as location area information associated with said second subscriber identity information.

Claim 8. (Original) A mobile network system comprising:

managing means for managing communication state of a mobile terminal having at least two telephone numbers;

judging means for judging, when an incoming call to said mobile terminal occurs, whether said mobile terminal is in communication by using anyone of said telephone numbers, based on said communication state; and

Application No. 09/903,958
Amendment "C" dated March 21, 2006
Reply to Office Action mailed September 22, 2005

processing means for performing a process for said incoming call in accordance with said judgment.

Claim 9. (Currently Amended) A location area information registration method for a mobile communication system comprising a mobile terminal and a subscriber information management apparatus that manages subscriber information, said method comprising:

a detecting step of detecting a loading of a plurality of recording [[medium]] media at said mobile terminal, each of the plurality of recording media storing a subscriber identity to be sent to said subscriber information management apparatus;

a transmitting step of transmitting, when said detecting step detects at least two recording media, first subscriber identity information corresponding to a first recording medium [[and]] along with second subscriber identity information corresponding to a newly detected recording medium, from said mobile terminal to said subscriber information management apparatus; and

a registering step of registering location area information of said first subscriber identity information as location area information associated with said second subscriber identity information at said subscriber information management apparatus.

Claim 10. (Original) A call control method in a mobile network system comprising managing means for managing communication state of a mobile terminal having at least two telephone numbers, said method comprising:

a judging step of judging, when an incoming call to said mobile terminal occurs, whether said mobile terminal is in communication by using anyone of said telephone numbers, based on said communication state; and

Application No. 69/903,958
Amendment "C" dated March 21, 2006
Reply to Office Action mailed September 22, 2005

a processing step of performing a process for said incoming call in accordance with said judgment.
